

Congratulations on choosing the

Sholley

The UK's number one shopping
trolley!

Welcome!

Just like tens of thousands of other Sholley shoppers we hope that your Sholley will become a firm friend you can depend on for many years to come.

The Sholley is so well built, you will find it not only takes immediate care of all your lifting, carrying and walking problems, but it actually represents a real long-term investment too!

For this reason, the real wisdom of your decision to purchase a Sholley Trolley will be even more apparent to you and others in time to come when the poorer imitation models have to be replaced.

Your Sholley will keep going strong and will last longer than these cheaper versions.

And with a little care and attention, your Sholley should last even longer – so far, the record is twenty years!

To ensure you get the best from your Sholley, I've written a few brief explanatory details as follows:-

Folding your Sholley flat

Open the lid and remove the card from the bottom of the bag. (Remove the shopping first, or your eggs maybe scrambled).

Stand behind the trolley as if to push it, and with the lid still open put one hand on each side of the top rail at the front of the trolley, (where the bag is fitted over the frame).

Now simply pull the front bar up towards the handle and the trolley will fold flat, even with the bag in place.

Lift front/
top of trolley
up and
towards
handle

All Sholley models also have a hanging hook to enable you to hang it in the front of a supermarket trolley or on a coat peg this is located under the front of the trolley bag.

Alternatively, a supermarket basket will fit snugly across the top rails of your Sholley when open or on the lid.

Your own personal handle position

Warning!

NEVER OVEREXTEND HANDLE AS THIS CAN CAUSE INTERNAL DAMAGE AND AFFECT GRIP

Because no single handle position will suit everyone we've designed the Sholley so you can choose the correct position that is exactly right for you.

On arrival, you will find the handle is in the 'pram' position. This is the perfect position if you have a long stride or you are tall. Naturally, you can adjust the height of the handle by releasing the top sections of the handle adjusters (This is very easily done by turning each top section anti-clockwise about 3 turns).

Gently ease out the handle to the desired height, then simply re-tighten the adjuster.

(The adjusters are designed that hand-tight is very tight – no tools should be required unless you have hand problems, in which case, it is preferable to ask someone for help.)

Test the tightness by pulling the handle up – it should not slip.

Keeping 'The Swing' in your Swivels

Like all swivel wheels, the latest design comprises of moving parts which in very dirty conditions can sometimes become stiffer.

Simple Maintenance:

Find your pliers and a can of silicone spray lubricant

Lay the Sholley on its side so you can inspect under the swivels

Where the swivel rotates are two prominent plastic parts that look a bit like a duck's open beak

Use the pliers to pinch these together and pull the swivel off the trolley

Now the wheel can be cleaned and once thoroughly clean sprayed well with the silicone spray

If your wheels feel stiff simply lock them in the straight ahead position until you are able to clean them

N.B. It is important to use a lubricant suitable for plastic and rubber (Available to buy from Sholleys)

After Sales Service

Unlike other shopping trolley manufacturers (who would like you to buy a new trolley every three years when your existing one wears out), we take a different view. We have specially designed the Sholley so that as individual parts wear out, they can easily be replaced and so extend the life of your Sholley.

And, on top of this, you are completely protected with a full one year guarantee.

This guarantee does cover manufacturing faults but does not include fair wear and tear or misuse.

To ensure your Sholley meets with your satisfaction. Please 'test-drive' it upon arrival in your own home as regrettably we cannot accept Sholleys used outside for exchange or refund.

In our offices, we have many letters from Sholley fans who have regularly used their Sholley for ten years or more. (If you would like to see copies, please contact us). And although we can't say exactly how long your Sholley will last, we do promise to make all the spares available to keep you rolling along!

Just call us on **01255 431444** or send your requirements by post – but please include your telephone number and post code where possible.

Thank you for shopping the Sholley way – we hope you will do so for many years to come.

Best Wishes

Jackie Clover
